Errata as of September 5, 2011

On page 92, of the Review of Emerging U.S. Shale Gas and Shale Oil Plays report, second paragraph should read:

Based on the leaseholders combined net acreage for Bakken, the area is approximately 6,522 square miles in the United States. The shale oil play has an average EUR of 550 MBO per well and approximately 3.59 Bbbl of technically recoverable oil. The Bakken shale ranges from 4,500 to over 11,000 feet deep with the most productive areas at 8,000 to 11,000 feet and an average thickness of 22 feet.
