Where shown, (s) = Physical unit value less than 0.5 or Btu value less than 0.05.

Notes: · Although there is renewable diesel use in other sectors, all renewable diesel consumption is assigned to the transportation sector. · Renewable diesel blended into diesel, which is accounted for under distillate fuel oil, is shown separately in this table to display the use of renewable energy. Because of differences in data sources and estimation methods, the ratio of renewable diesel consumption and distillate fuel oil consumption should not be

interpreted as the average renewable diesel blend ratio. · Totals may not equal sum of components due to independent rounding.
